Summary

Aspiring Software Engineer with strong fundamentals in Data Structures, Algorithms, and C++. Passionate about problem-solving and building efficient, scalable solutions. Eager to contribute and grow in a dynamic software development environment.

Skills

Programming Languages: C, C++ , Java

Core CS Concepts: Data Structures, OOP, DBMS

Tools: Git, VS Code, Jupyter Notebook

Machine Learning Libraries: NumPy, Pandas, Matplotlib, Seaborn, TensorFlow, Keras, AI

Experience

AI/ML Intern

March 2025 – April 2025

Prasunet Pvt. Ltd. (Remote)

Tools Used: Python, NumPy, Pandas, Jupyter Notebook, Git

- Collaborated with a team to develop a **Bank Customer Churn Prediction** model.
- Implemented data preprocessing, feature engineering, and trained classification models like Logistic Regression and Random Forest.
- Evaluated model performance to improve prediction accuracy and presented findings to the team.

Projects

Bank Customer Churn Prediction | Python, NumPy, Pandas, Seaborn

March 2025 – April 2025

- Analyzed a dataset of 10,000+ bank customers to predict churn probability based on demographics, account balance, and transaction history.
- Performed data cleaning, feature engineering (e.g., tenure buckets, credit score segmentation)
- Built regression and classification models (Logistic Regression, Random Forest) achieving **89% prediction accuracy**.

Smart Door Authentication System | React.js, AWS Cloud, IoT, Python, TensorFlow, OpenCV Nov 2024 – Dec 2024

- Built a face recognition based smart door authentication system using TensorFlow and Keras achieving **91% recognition accuracy**.
- Integrated AWS Cloud to securely store and transmit user data between IoT enabled devices and backend.
- Implemented data preprocessing including face detection, alignment, and normalization using OpenCV for reliable authentication.

Achievements

- Participated in SIH Hackathon 2024, gaining hands-on experience in problem-solving and teamwork.
- Developed strong communication and analytical thinking skills through various academic and project activities.

Certifications

- C++ Programming – Udemy (2024)
- Python Programming – Coursera (2024)

Education

B.Tech in Computer Science and Internet of Things (CS-IoT)

Expected 2026

Sagar Institute of Science, Technology and Engineering (RGPV University)

CGPA: 7.8 / 10
